GLOBAL ENROLLMENT
to June 30, 2022

WELCOME **UNIVERSITY OF ARIZONA**

We WELCOME to CARSK Dr. Ariyamuthu (PI) and his team: Dr. Shetty (co-I), Dr. Tanriover (co-I), Dr. Qannus (co-I), Nicole Marquez (RC), Stephanie Soto (RC), Ayda Menjugas MacDuff (NP) and Katherine Mendoza (RM)! Huge Thanks to all for completing the start up activities that lead to site activation in May.

CONGRATULATIONS!

We are excited to have you on board!

Dr. Venkatesh Ariyamuthu serves as the Medical Director for the Kidney and Pancreas Transplant Programs at the Banner University Medical Center in Tucson, AZ. He did his medical school and residency training in India, followed by graduate medical education in the US, including a transplant

nephrology fellowship at Northwestern Memorial Hospital in Chicago. His special interests are recurrent glomerular diseases in kidney transplants, cardiovascular disease in kidney disease patients, and utilization of high-risk for discard organs.

MUHC

McGill University Health Centre

SITE OF THE MONTH

Norka Rios, RN, and Dr. Rita Suri, Co-I, Efrosyne Tsirella, RN.

The Nephrology Division at the McGill University Health Centre (MUHC) provides patient care, teaching and conducts research, in various aspects of the pathophysiology and treatment of kidney disease.

In addition to an active consultation program, this busy clinic offers outpatient consultations two mornings per week, as well as a chronic renal insufficiency clinic that is dedicated to patients who are in the pre-dialysis (or pre-transplant) phase of their kidney disease. The division operates three in-centre hemodialysis units with approximately 280 patients and an active home dialysis program (both peritoneal dialysis and hemodialysis) with approximately 45 patients. It also operates Quebec's highest-volume kidney transplant program with approximately 100 transplants performed annually, and 1000 patients with kidney transplants followed in the outpatient clinic. The MUHC Nephrology Division also provides advanced renal care to the indigenous populations of northern Quebec with three local in-centre hemodialysis units, a growing home dialysis program, and kidney protection clinics offered locally and via telehealth.

Congratulations to Dr. Cantarovich and his team for recruiting and randomizing 13 participants in the past two months. The effort and quality of work the team has put into CARSK has been so helpful for the Study and we are grateful for such an impressive result!

THANK YOU MCGILL TEAM!

Dr. Marcelo Cantarovich, PI

Marcelo Cantarovich is Professor of Medicine, and Associate Director (Multi-Organ Transplant Program) at McGill University (Montreal, Canada). He currently serves as TTS President. His research focuses on multi-organ transplantation, immunopharmacology and renal protection strategies. He has published over 150 manuscripts in peer-reviewed journals. He is the past President of the Canadian Society of Transplantation. He is the Chair of the TTS 2022 Congress in Buenos Aires. His primary focus is continuing education for young and established TTS members and to increase global access to transplantation.
